

The facts about **AMENDMENT 1** in Tennessee

AMENDMENT 1

“NOTHING IN THIS CONSTITUTION SECURES OR PROTECTS A RIGHT TO ABORTION OR REQUIRES THE FUNDING OF AN ABORTION. THE PEOPLE RETAIN THE RIGHT THROUGH THEIR ELECTED STATE REPRESENTATIVES AND STATE SENATORS TO ENACT, AMEND, OR REPEAL STATUTES REGARDING ABORTION, INCLUDING, BUT NOT LIMITED TO, CIRCUMSTANCES OF PREGNANCY RESULTING FROM RAPE OR INCEST OR WHEN NECESSARY TO SAVE THE LIFE OF THE MOTHER.”

The amendment is needed because Tennessee's state Supreme Court “found” a “right to abortion” in our state constitution. As a result, our abortion-specific informed consent law and waiting period law were ruled unconstitutional. The state is also unable to enforce regulations for the safe operation of abortion clinics.

Requirements for Amending the Constitution

Any proposed amendment that is out on the ballot is not a simple yes-or-no referendum for which a simple majority vote decides the issue.

In order for the amendment to be added to the constitution, the amendment must get a number of "YES" votes equal to 50% of the votes cast in the Governor's race plus one. A majority vote is not enough. Say, for example, 1,000,000 people vote in the Governor's race.

If 500,000 people vote in favor of the amendment, and only 400,000 vote against it, the amendment fails! In this example, the amendment must receive at least 500,001 "YES" votes to pass.

Because of this requirement, every person who votes in the Governor's election but who does not also vote for the amendment will have effectively "voted" AGAINST the amendment.

How Many Babies Could Be Saved?

If  Tennessee's abortion rate per  x 1000

had been as low as the abortion rate in Arkansas, Kentucky or Mississippi, the states from which the most out-of-state women come for abortions, then fewer Tennesseans would have had abortions, saving babies' lives. This chart shows the number of babies which would **not have been aborted in Tennessee*** were our abortion rate the same as:

 **Arkansas' rate:** 3,558  babies saved

 **Kentucky's rate:** 7,211  babies saved

 **Mississippi's rate:** 7,620  babies saved

The greatest obvious difference between Tennessee and these states is their pro-life laws, laws that are no longer constitutional here.

* Based on C.D.C. 11/29/13 report & corresponding U.S. Census data.
